

# Lesson 4

## Gun Safety / Marksmanship

### Gun Cocking Procedure

Let's talk about how we cock this Daisy AVANTI Champion BB gun:

1. Put the safety in the "ON" position.
2. Muzzle up and down range.
3. Foot secures butt of gun on the floor.
4. Pull cocking lever up until it clicks.
5. Place lever back into lever grip.
6. Load a BB in the gun.

### Passing the Gun from the Loader to the Shooter

1. Grip the forearm of the gun with their left hand
2. Pass the gun to the shooter with the muzzle always pointed down range
3. Shooter, take the gun with right hand, gripping the pistol grip of the rifle

Let's review the lollipop:

### Prone Position

Prone means lying down. We will shoot while lying on our bellies.

### Bent Leg Prone Position

1. The body lies at an angle of about 5 to 10 degrees with the line of aim.
2. The spine is straight.
3. The left leg is relaxed, drawn-up slightly.
4. The left foot should be straight back or bent to the right.
5. The left heel does not touch the ground.
6. The right leg angles away from the spine with the knee bent and the body rolled on the left side.
7. The left elbow is beneath and slightly to the outside of the rifle.

Competitors may lie on the bare surface of the firing point or they may use a mat. The body will be extended on the firing point with the head toward the target. The BB gun will be supported by both hands and one shoulder only. The cheek may be placed against the rifle stock in the sighting position.

The BB gun may be held by the means of a sling. The BB gun may not touch or rest against any other points or object. Competitors' forearms must be clearly and visibly raised from the surface of the firing point. Competitors' forward forearm may not form an angle less than 30 degrees from the horizontal on which the elbows rest.
